The illustration depicts a computer monitor displaying a web-based application for data scraping. The application has a dark header bar with three colored window control buttons (red, yellow, green). Below the header is a table with 11 rows, each containing five columns: '#', 'Image', 'Product type', 'Description', 'Rating', and 'Delivery time'. The 'Image' column shows small blue placeholder icons. The 'Product type' column contains mostly empty space except for row 4 which has a light blue background. The 'Description' column has short blue horizontal bars. The 'Rating' and 'Delivery time' columns also have short blue horizontal bars. A large blue magnifying glass is positioned over the first few rows of the table, focusing on the 'Image' and 'Product type' columns. A white callout bubble with a blue border and rounded corners contains the word 'Twitter' in a bold, blue, sans-serif font. The entire application window is set against a light gray background with a large, semi-transparent blue circular overlay centered behind it. On the right side of the screen, there is a vertical blue sidebar with the word 'Accessibility' written in white capital letters.

Web Scraper IDE Features

Leave your scraping limitations behind with our hosted cloud solution

Pre-made web scraper templates

Get started quickly and adapt existing code to your specific needs

[Start Free Trial](#)

watch your code as you build it and debug errors in your code quickly

Built-in debug tools

Debug what happened in a past crawl to understand what needs fixing in the next version

Accessibility

Browser scripting in JavaScript

Handle your browser control and parsing codes with simple procedural JavaScript

Ready-made functions

Capture browser network calls, configure a proxy, extract data from lazy loading UI, and more!

Easy parser creation

[Start Free Trial](#)

Auto-scaling infrastructure

You don't need to invest in the hardware or software to manage an enterprise-grade web scraper

Accessibility

Integration

Emulate a user in any geo-location with built-in fingerprinting, automated retries, CAPTCHA solving, and more.

Built-in debug tools

Trigger crawls on a schedule or by API, and connect our API to major storage platforms

How to leverage a Twitter Followers Scraper for your business:

- Target the right populations that are interested in a particular industry or topic
- Build custom audiences for ad campaigns and to gain more followers for your business
